APPLICATION SAMPLES

JAVASCRIPT | CSS | HANDLEBARS | EXPRESS.JS

Nebula's Fables

- Collaborated with a group of peers to build this application
- Interactive learning tool
- Allows users to search constellations and stars with the NASA public image library API
- Uses Wikipedia API to pull in a summary of the topic searched
- Using handlebars.js as the templating language to dynamically create pages
- Uses Sequelize for account creation and user authentication

JAVASCRIPT | CSS | HANDLEBARS | MYSQL2

Tech Blog

- A CMS-style blog, similar to a wordpress site
- Uses Model, View, Controller achitectural structure
- Uses handlebars.js as the templating language
- Express-sessions handles user authentication
- Uses Sequelize for Object Relational Mapping to connect to database

HTML | CSS | JAVASCRIPT | NODE.JS

Notetaker

- Created visual stories with products based on company standards
- Set window and mannequin displays
- Presented category and product sales in weekly meetings
- Maintained knowledge of new and upcoming products and technology
- Stocking, cleaning, and customer service as needed

HTML | CSS | JAVASCRIPT

Weather Forecast

- This application focuses on third-party APIs
- Using OpenWeather API to retrieve a 5-day forecast for the user's searched city
- Shows icon that matches weather conditions, lists humidity, wind speed and temperature
- Uses LocalStorage to store persistant data and allows users to have a search history to re-search cities
- Has a clean user interface

HTML | CSS | JAVASCRIPT

Logo Generator

- Using Inquirer for command line interface prompts to generate shapes and text to create basic logos
- Creates Scaleable Vector Graphic in a dist folder
- Uses Jest package for Test Driven Development to test functionality
